William D. Brizzee, DDS

Benjamin J. Barborka, DMD

Benjamin Brown, DMD, MSD

Las Vegas Endodontics is a dental practice dedicated exclusively to endodontic care, specializing in **root canal therapy and root surgery**. By referring you to our office your dentist has shown their concern that you receive the finest endodontic care possible.

Endodontists are **specialists** in saving teeth. They have received at least two additional years of specialized education beyond dental school.

Our doctors strive to utilize state-of-the-art technologies such as digital x-rays, microscopes, and modern disinfection devices. The latest advancements in our practice include CBCT and GentleWave.

The CBCT, a 3-Dimensional Imaging System provides unparalleled diagnostic radiographs and 3 dimensional modeling. A study published in the Journal of Endodontics concluded that CBCT imaging may lead to treatment plan modification 62% of the time. We have found periapical lesions, perforations, cysts, and resorptive defects that are invisible on traditional periapical radiographs.
